

COMPANY PROFILE

ftexim

ftexim

Who We Are

We develop and produce quality knitwear by passionate people, high end technology and mastered processes to contribute brand customer success.

OUR FUTURE BUSINESS VISION IS:

"to be the preferred partner for premium brand customers and be recognized as the role model for business excellence in this sector".

A benchmark in Turkish flat-knit sector. With 182 latest technology Stoll machines ranging from gauges 3 to 16, Texim Knits offers a vast range of knitwear products.

Intensive know-how and the SAP based production monitoring system together provide high efficiency, accurate delivery and quality performance. The fully integrated development plant grants a very strong and extensive R&D service. And the high technology of the facility offers all kinds of knitting and finishing techniques possible, as well as special treatment options on different fibers from merino to cotton, lambswool to cashmere.

Qualified team, efficient set-up and flexible service: Texim is the future of knitwear production business.

**YOUR KNITWEAR,
OUR BUSINESS.**

Corporate Values

Our six values define our business model and merge to added value for our stakeholders:

_Ahead

_Agile

_Able

_Inspiring

_Demanding

_Excellent

Our Service Package

We offer full service at each stage of the product life-cycle, from initial design to final shipment. Our extensive coverage service includes;

Premium quality product visible in outcome,

Comprehensive research & design service,

Fast prototype and collection development service,

Transparent pricing policy,

Strong raw material procurement,

Professional order management,

Precise production and shipment planning,

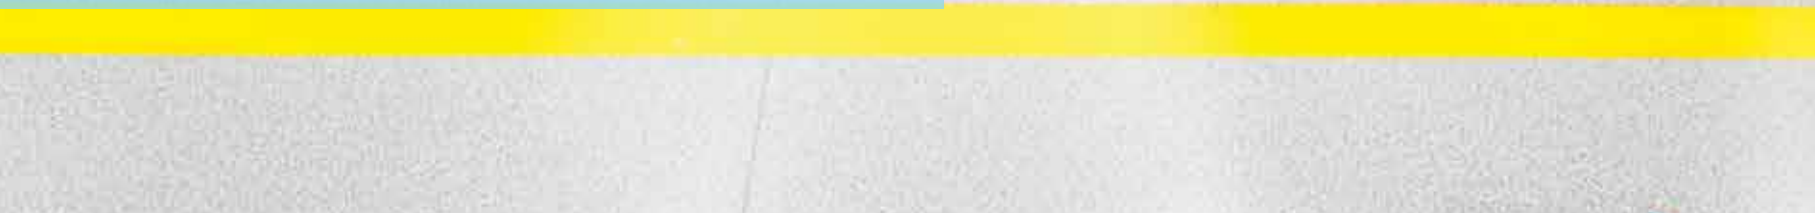

Variety of product portfolio,

- and -

Long lasting after sales support.

**HIGH ADDED VALUE

MANAGEMENT.**

Products

Our product portfolio is extremely wide. We do both men's and women's lines covering a versatile mix of items ranging from core basics to fashion driven products.

As for knitting, we offer all possible techniques available in today's modern technologies, from 3 gg to 16 gg; including a range of jacquards, intersia knittings, platings and a lot more.

Our database of raw materials includes many fashion qualities as well all core fiber types.

Furthermore, we have an extensive portfolio of add-ons like high quality logo embroideries and prints.

All together we offer a diverse product portfolio to fully cover the knitwear collection of your brand.

A close-up photograph of three different knitted fabric samples. On the left is a vibrant blue knit. In the center is a white knit with a subtle pinkish tint. On the right is a bright red knit. The textures are soft and detailed, showing the individual stitches. A semi-transparent pink rectangular box is overlaid on the bottom left, containing white text.

TAILORED TO YOUR
BRAND NEEDS.**

FIBER TYPES

MERINO

LONG LIVE EXTRAFINE MERINO WOOL!

When it comes to Italian merino, Texim is a world player. We import more than 300 tons of fine Italian merino every year, treating this fibre the way it deserves from knitting to finishing. We source all counts of merino wool, including dependable

good old 30/2, valued 36/2, fine 48/2, and the avantgarde 60/2. Merino is a habitual spirit. It is an identity more than just a sweater. And we make the finest "Made in Turkey" sweaters with the finest "Made in Italy" merino wool.

LAMBSWOOL

THE ONLY COMPETITOR TO MERINO

Lambswool is definitely another culture of wearing quality knitwear. We source the finest Italian and Turkish lambswool qualities, suitable for different gauges.

The main counts used are 15/1, 15/2, 26/2 and 28/2. As preference we can also offer lambswool-polyamide blends for a more rigid and yet softer product.

CASHMERE

INSPIRING ALL YOUR SENSES: CASHMERE

Few things in the world can be so appealing to our senses as a finely knitted and treated cashmere sweater. The minute you touch it, you understand it.

fibre type, we deliver the perfect cashmere sweater to our clients, to match up with their premium collections.

Cashmere has long been the choice of the elite. Thanks to our highly advanced and fully automated treatment facilities and extensive know-how on this

All our cashmere comes from Italy or China, depending on the client's choice. We offer a very wide stock service range in Cashmere.

COTTON

THE ONLY THING BETTER THAN A POLO SHIRT IN SUMMER: COTTON SWEATER

Turkey is a cotton country. Our nominated suppliers provide best cotton qualities for us, including a range of compact cotton, giza cotton and pima cotton. Counts differ between Ne 20/2 to 50/2. Three ply versions are also available.

pima or giza cotton tags on your products, we do source the necessary certificates.

Furthermore, even finer cotton qualities are imported from Italy. If you prefer to have special

Our fine gauge machinery park allows us to offer 14 and 16 gauge cotton sweaters, so that the product fits for even the hottest summer periods.

Who says sweaters can be worn only in winter?

OTHER BLENDS

OUR OFFERINGS ARE LIMITED ONLY TO YOUR IMAGINATION

Beside the core yarn types listed above, we do source all kinds of fibers from three main markets- Italy, Turkey and China. These include pure silk, silk cashmere, cotton cashmere, cotton elastane, viscose elastane, wool elastane, lambswool blends, wool acrylic, cotton acrylic, cotton wool and many others.

Finally most of our yarns are offered as stock service as well, offering flexibility and better service for your collection.

MANUFACTURING STRENGTH

Manufacturing Strength

Texim is a vertically integrated knitwear production facility. This means our production flow is durable and sustainable. With more than 10,000 square meters of manufacturing space and 800 staff, we produce 2.4 million pieces of quality products annually.

We believe that goals can only be achieved by a team of professionals with enthusiasm and business discipline at the same time. And mastered processes can only be sustained by a high know-how level. This is why in Texim we give great importance to process improvement and training of our operators on continuous basis. While our engineering team runs an efficient production on the field, quality monitoring team ensures sustainable quality in each and every step of manufacturing.

Besides technical know-how for a tailored outcome, we rely also on latest technologies. All our facilities are fitted with modern machinery and equipment that enable us to produce latest industry trends with competitive costs. And our SAP-based production planning and monitoring systems ensure accurate delivery performance and effective quality monitoring.

PRODUCTION POWER**

DEVELOPMENT

KNITTING

WASHING & TREATMENT

Manufacturing
Strength

OUR “KNIT-LAB” IS DEDICATED TO YOUR DESIGNERS

Today's fashion industry depends on speed. With this basic principle in mind, we built up a separate collection and development plant which we call “Knit-Lab” to fulfill the needs of your designers in the fastest and most effective way possible. In our Knit-Lab, we make all development samples, prototypes, knit-downs, pre-production samples and all other necessary trials for a comprehensive collection, and later on for a smooth production.

The know-how we accumulated in our Knit-Lab is valueless. We offer proactive solutions to problems clients may face with new yarns or techniques. Countless number of past experience and technical data in the Knit-Lab help the designers built up a risk-free collection. And we engineer the product before passing it to production so that it is at the optimum level in terms of cost and outcome, making the buying teams happy as well.

HEART OF OUR PRODUCTION

All our knitting machines are up-to-date with the latest pattern systems available and are technically capable enough to knit all kinds techniques like intersia, jacquard, ottoman, milano-stitch, cable structure and links-knitting.

Machinery portfolio includes gauges ranging from 3 to 16, as well as special intersia machines. Also in the inventory machines with long needle beds are present which allows knitting even the biggest sizes.

A GOOD OUTCOME IN WASHING DEPENDS ON 4 VARIABLES: EQUIPMENT, WATER, CHEMICALS AND THE RECIPE.

Correct equipment covers the first part of knitwear treatment. Our laundry facility is fitted with state-of-the-art fully electronic washing and drying equipment. Our washing machines decide themselves automatically the correct amount of water and chemicals to be used according to the exact weight of the garments, therefore deviance is very limited. Our tumble dryers have special systems that dry garments while maintaining their volumes. And furthermore, we also have dry cleaning equipment that helps us obtain handfeels not possible with washing machines.

Final element of the process is the recipes used. Considering tremendous types of different yarns used in knitwear production, recipes are the key elements in achieving the desired handfeel on the garment. For this purpose, we use recipes that come from our joint venture partner treatment laboratory in Italy. That means, we not only use Italian yarns but also Italian know-how, with Turkey's competitive costs.

Second element of correct knitwear treatment is the water itself. This means water used in knitwear washing should be filtered and always kept in a stable pH and softness level for the chemicals to perform in the desired way. This is exactly how we treat the water we use in our washing process.

Then comes the chemicals used. In Texim, we only use chemicals from world-known nominated suppliers, always fresh and sustainable. Maintaining consistency of chemicals assures a durable performance on washing process.

CONFECTION

STEAMING & FINISHING

QUALITY INSPECTION

Manufacturing
Strength

CONFECTION OF FINE GAUGE KNITWEAR IS AN EXPERTISE ITSELF.

Those who are in this business know very well that confection of fine gauge knitwear is a different speciality.

Our confection facility in Texim is capable enough to link all kinds of knitted garments, with any technique requested. We have linking machinery up to 21 gg.

allowing us to sew finest knitted garments very clearly.

Besides linking, we possess special confection machinery for different purposes including pockets, zips, special tags, buttons and other trimmings.

A SWEATER IS NOT FINISHED WITHOUT A PERFECT PRESSING.

We use high technology laser steaming and pressing equipment for a perfect finishing on the sweater. Our presses are fitted with automatic moulds to shape the garments in the desired way. Alternatively our operators have extensive know-how on using manual moulds for more fashion products.

A good pressing process ensures a long-term fit on the knitwear garment and makes the surface much more appealing to the eye. This is where technology meets craftsmanship.

OUR METHODOLOGY IS TO *PRODUCE* QUALITY.

Classical systems and flows in textiles industry work with quality inspection systems at the end of the manufacturing chain. Despite the fact that this solid way is still in use today, it has been modified greatly by the advanced monitoring & engineering systems developed in the last decade.

Today, quality is something to be produced. That means, at every stage of the production, from raw

material supply to final shipment, quality is to be an integrated part of the process. Each production unit in Texim is organized and managed in this principle. Our SAP-based Quality Assurance System constantly monitors that the production is in the standards predefined and desired. Consistency of this system is ensured by an independent team who report directly to management.

A World Player in Eurasia Zone

NEW TREND IN KNITWEAR INDUSTRY: "MADE IN TURKEY"

Turkey is the optimum mix of all necessary parameters in fashion industry: Quality, flexibility, competitiveness and speed. Within all the knitwear supplying countries today, Turkey alone makes a perfect balance of all above.

Turkey is at the very center of all major buying and sourcing centers of Eurasia zone. While enjoying Turkish raw materials for competitive prices, we also import yarn conveniently from Italy. We are good at producing core basics and extreme fashion together. We handle biggest and smallest orders at the same time. Our long history of working with the global markets makes us the most suitable supplier for knitwear production in the region.

And within the Turkish supply market, Texim stands as a trademark for its quality standards, versatile product portfolio and precise shipment performance.

At the end, our Business is your Knitwear.
